PARTS OF A WEARABLE COMPUTER

The parts inside a wearable computer are very similar to the ones found in a home computer, the main difference being the size of the components!

- **ENCLOSURE**
- **WRISTBAND / STRAP**
- **BUTTON / DIAL**
- **TOUCHSCREEN**
  Used to control the menu driven user interface.
- **OLED / AMOLED DISPLAY**
  Displays the output from the wearable computer.
- **LOUDSPEAKER**
- **HEART MONITOR**
- **WIRELESS CHARGING COIL**
- **MOTHERBOARD / PCB**
  The circuit board inside a computer that connects all the components.
- **STORAGE**
  Used to store all the data and programs on the computer.
- **PROCESSOR (CPU)**
  The brains of the computer that processes program instructions.
- **PSU / BATTERY**
  Supplies power to the wearable computer.
