## Worksheet Activity: Working With Binary

The binary system uses zero and one to represent whether a card is face up or not. $\mathbf{0}$ shows that a card is hidden, and $\mathbf{1}$ means that you can see the dots. For example:

Can you work out what $\mathbf{1 0 1 0 1}$ is? What about 11111?
What day of the month were you born? Write it in binary. Find out what your friend's birthdays are in binary.

## Try to work out these coded numbers:

Extra for Experts: Using a set of rods of length 1, 2, 4, 8 and 16 units show how you can make any length up to 31 units. Or you could surprise an adult and show them how they only need a balance scale and a few weights to be able to weigh those heavy things like suitcases or boxes!
